

September 2021 Quarterly Report

HIGHLIGHTS

- Drilling at Tesorito South porphyry discovery continues to deliver high grade gold zones within outstanding wide gold mineralised intercepts. Porphyry mineralisation remains open in every lateral direction tested
- Drilling commenced at new Ceibal porphyry target ~1km from Tesorito. Extensive porphyry gold mineralisation intersected
- Regional target generation program identifies multiple targets for further investigation
- Deep penetrating IP over priority area complete and drone aero-magnetic surveys of entire Quinchia project area making good progress
- \$20M capital raising completed, anchored by lead orders from two major North American institutional investors and well supported by Australian, Asian and UK institutions.

Los Cerros Limited (ASX: LCL) (Los Cerros or the Company) continues to experience significant exploration success at its 100% owned Quinchia Gold Project in Risaralda – Colombia. During the quarter, drilling at Tesorito South porphyry delivered more exceptional drill results with mineralisation expanding in every lateral direction tested. The first two holes ever drilled at the Ceibal porphyry target delivered extensive gold mineralisation from surface. Four rigs were in continuous operation during the quarter and substantial early-stage field and geophysics programs were undertaken. The Company raised ~AUD\$20M during the quarter and in the process welcomed two major North America institutional investors, each taking a ~5% position in LCL. At the end of the Quarter the Company had \$23.4 million in cash at bank, boosted by the capital raise and exercise of share options.

Tesorito drilling extends gold envelopes northward

The quarter's Tesorito South drill program focussed primarily on step-out drilling broadly testing northern extensions to modelled gold envelopes. Assay results for a total of six holes for 2,266m of diamond drilling was reported during the quarter with all drill core delivering substantial lengths of gold mineralisation¹.

Drill holes TS-DH24, '25, '26, '29 and '30 were drilled as a radiating pattern from the same pad located NE of the main area of earlier focus (Figure 1). All five holes intercepted high grade surface gold interpreted to be where the porphyry core reaches surface. This bodes well for potential project economics which could access near surface high grade gold in critical early production years. Results include¹:

- 36m @ 3.31g/t Au within 378m @ 1.03g/t Au from surface in TS-DH24 (announced previous quarter);
- 24.3m @ 2.69g/t Au from surface within 330.3m @ 0.99g/t Au from surface in TS-DH25;
- 10.0m @ 2.13g/t Au from 2m within 158.0m @ 1.42g/t Au from surface in TS-DH26;
- 33.4m @ 2.51g/t Au from 2.6m within 107.6m @ 1.1g/t Au from surface in TS-DH29; and
- **27.7m** @ 1.94g/t Au from 6m within 144m @ 1.2g/t Au from 6m in TS-DH30.

Drill hole TS-DH27 was a ~120m NE step out from the common pad described above. The drill hole entered porphyry suite lithologies from 35m thus defining the near-surface eastern edge of mineralisation in this area.

¹ Please refer to Table 1 for the dates of the initial ASX announcements for assay results from the Tesorito drillholes.

The drill hole exited the porphyry system at 333m downhole after intersecting the following zones of elevated gold¹:

- 36m @ 1.01g/t Au from 116m; and
- 72m @ 1.00g/t Au from 188m; including 6m @ 2.05g/t Au from 254m in TS-DH27.

Drill hole TS-DH28 was a step out of approximately 100m to the north of the common pad. After passing a previously encountered, lower grade intermineral diorite pulse from surface to 137m, drilling then encountered the targeted early diorite and delivered a very wide intercept of 280m @ 0.83g/t Au starting from 148m including**116m @ 1.17g/t Au from 148m¹**.

Figure 1: Plan view of Tesorito South showing drill traces and assay results released during the quarter over modelled gold grade envelopes and key structures.

27 October 2021 ASX Announcement ASX: LCL

Table 1: Tesorito drill holes of note. Red box = result released during the July - September 2021 Quarter. See announcements 28 September 2021 (TS-DH27, '28, '30), 9 August 21 (TS-DH27), 12 July 2021 (TS-DH25, '26), 22 June 2021 (TS-DH24), 28 May 2021 (TS-DH18 '19 '22 '23), 19 April 2021 (TS-DH17, '20, '21), 6 April 2021 (TS-DH16), 18 March 2021 (TS-DH15), 21 January 2021 (TS-DH12 '13 '14), 10 November 2020 (TS-DH10 '11), 10 September 2020 (TS-DH08) and 9 October 2020 (TS-DH09) for assay results. See announcements 31 July 2018 and 30 August 2018 for the initial reporting of the assays for drill holes TS-DH01 to TS-DH07. The Company confirms that it is not aware of any new information that affects the information contained in the announcement.

First Ceibal holes intersect extensive porphyry gold mineralisation

The first two holes drilled at Ceibal, the Company's new porphyry target, located less than 1km to the southwest of the Tesorito South porphyry (Figure 3), delivered low to moderate grade gold and persistent porphyry signature pathfinders over the entire core lengths (Figure 2). Results include²:

CEDDH01: 500m @ 0.52g/t Au from surface including:

- o 72.0m @ 0.78g/t Au from surface including 24.0m @ 0.95g/t Au from 42m, and
- CEDDH02: 586m @ 0.51g/t Au from surface including:
 - o 52.0m @ 0.81g/t Au from 176m
 - 14.1m @ 1.02g/t Au from 572.5m to end of hole.

² First announced 8 July 2021. The Company confirms that it is not aware of any new information that affects the information contained in the announcement.

This very encouraging start to investigating a new target provides further evidence of the Marmato Fault Corridor being a highly prospective region for the emplacement of significant gold porphyry systems. The Company has completed a further four drill holes at Ceibal with assays pending at the date of this report.

Target generation program identifies multiple targets for investigation

An extensive target generation program described in the Company's ASX announcement of 11 May 2021 has generated multiple additional porphyry and epithermal gold targets at Quinchia (Figure 3). During the quarter, the Company expanded the technical team to form a dedicated target generation team to methodically investigate and evaluate mapping and sampling programs at the target areas. An IP geophysics program was completed near the end of the quarter. The regional drone aeromagnetic survey remains in progress across much of Quinchia, however, the region overlapping the recently completed deep penetrating IP is completed.

Figure 3: With an increasingly sophisticated geology model, Los Cerros has identified many new targets (white ovals) for its project generation program at Quinchia.

Progressing final submissions for mining approvals at Miraflores

Los Cerros continues to progress the final elements of submissions for granting of mining approvals at Miraflores. The submissions conform to the key parameters and design generated in the 2017 Miraflores DFS³ which describes a longhole open stope with backfill underground mining operation feeding a 1,300tpd conventional float-CIL plant. Whilst most technical elements of the submission are in place, community

³ *Refer ASX announcement dated 30 October 2017*

consultation inputs have been delayed by Covid restrictions preventing community meetings and similar. The Company anticipates completion of final submissions before the end of the year.

\$20M capital raise welcomes North American institutions to LCL

In July 2021 the Company raised of AUD\$20,190,000 via private placement to professional and sophisticated investors welcomed two high profile North American gold funds which collectively invested approximately \$10 million in the placement. Joining them were a number of institutional and high net worth investors from Australia, UK, and Asia, as well as existing professional and sophisticated shareholders. The Company received firm bids for well in excess of the \$20 million target.

Sprott Capital Partners and Euroz Hartleys Limited acted as Joint-Lead Managers for the placement. Treadstone Resource Partners acted as strategic and financial adviser to Los Cerros.

During the quarter, the Company's quoted 16c options (LCLOB) expired on 16 August 2021. Prior to their expiry, 14.29M LCLOB options were converted in quarter, which raised \$2.29 million. Also in the quarter, approximately 3.5M unlisted options, exercisable at 2c, 7c and 10c, were exercised and provided a further \$302,000.

The boost to Los Cerros cash reserves, plus the strategic investment by tier one institutions, places the Company in a very strong position (\$23.4 million in cash at end of quarter) to advance its Colombian assets and sustain a multi-drill rig, multi target exploration program.

Post Quarter Developments

Interpretation and assimilation of recent drone aero-magnetic and deep penetrating IP (Induced Polarisation) geophysical survey data was released to the ASX on 26 October 2021. The surveys, when combined with other information and incorporated into the Company's geological model, identified a significant gold porphyry target central to Miraflores and Tesorito (Figure 4). This is considered an exciting development and a drill program to test the target has been planned.

Figure 4: 3-D section looking NNW. A large IP chargeability high has been described between the Miraflores deposit (grey masses describing zones of >1.0g/t Au within the larger Miraflores Mineral Resource) and Tesorito

prospect. NOTE: strong drill core gold assay results from across much of Tesorito South drilling correlate to a local chargeability high extending from the major chargeability high.

The Quarter Ahead

The Company believes the significant delays in laboratory assay turnaround experienced during the quarter are largely resolved. The current quarter is therefore expected to see continued news flow from the four drill rigs in operation at Quinchia, supplemented by further revelations from the geophysics and target generation programs. Subject to Covid-19 restrictions hampering some consultation elements, the Company expects to submit remaining documentation related to Miraflores mining approvals to relevant authorities during the quarter.

Appendix 5B disclosures:

As outlined in the attached Appendix 5B, during the quarter the Company spent approximately:

- \$2,093k on exploration activities;
- \$131k in payments made to related parties and their associates for director salaries, consultancy fees, superannuation, and other related costs; and
- \$925k on administration and corporate costs.

The Company held cash and cash equivalents of \$23.4 million at the end of the quarter.

27 October 2021 ASX Announcement ASX: LCL

About Los Cerros

Los Cerros Limited is a gold/copper explorer with a dominant position within the Andes and Quinchia regions of the mid-Cauca Gold Belt of Colombia which hosts many major discoveries (Figure 4). The Quinchia Gold Project hosts the Miraflores Gold Deposit with a **Resource of 877,000 Au ounces at 2.80g/t Au** and **Reserve of 457,000 Au ounces at 3.29g/t Au**⁴. Within 3km of Miraflores is the Tesorito near surface porphyry and the Chuscal and Ceibal porphyry targets. Other targets within the Quinchia Gold Project (Figure 3) include the Dosquebradas deposit which has an Inferred Resource of **459,000 ounces at 0.71g/t Au**⁵.

Figure 4: The Company's Andes and Quinchia Gold Projects sit on the Miocene aged, mid-Cauca Gold Belt in a sub-section of the belt that hosts many major copper-gold porphyry discoveries.

Metal volume estimates are taken from various company websites and may or may not include Inferred Resources and have not been independently verified.

⁴ Refer ASX announcement dated 14 March 2017 (Resource) and 27 November 2017 (Reserve). The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcements, and that all material assumptions and technical parameters underpinning the estimates continue to apply ⁵ Inferred Mineral Resources using 0.5g/t Au cut-off grade. See announcement 25 February 2020. The Company confirms that it is not aware of any new

⁵ Inferred Mineral Resources using 0.5g/t Au cut-off grade. See announcement 25 February 2020. The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcement and that all material assumptions and technical parameters underpinning the estimate continue to apply

The Andes Gold Project (Los Cerros 90%, BHC 10% free carry to FS) is a larger area of early stage exploration in the state of Antioquia ~70km north of Quinchia. The Company has previously completed extensive preliminary surface work at many sites within the expansive footprint including ~14,000 surface samples to identify multiple early stage epithermal gold and porphyry gold +/- copper targets.

For the purpose of ASX Listing Rule 15.5, the Board has authorised for this announcement to be released.

FORWARD LOOKING STATEMENTS This document contains forward looking statements concerning Los Cerros. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. Forward looking statements in this document are based on Los Cerros' beliefs, opinions and estimates of Los Cerros as of the dates the forward-looking statements are made, and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments. Although management believes that the assumptions made by the Company and the expectations represented by such information are reasonable, there can be no assurance that the forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any anticipated future results, performance or achievements expressed or implied by such forward-looking information. Such factors include, among others, the actual market price of gold, the actual results of future exploration, changes in project parameters as plans continue to be evaluated, as well as those factors disclosed in the Company's publicly filed documents. Readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws. No representation, warranty or undertaking, express or implied, is given or made by the Company that the occurrence of the events expressed or implied in any forward-looking statements in this presentation will actually occur.

JORC STATEMENTS - COMPETENT PERSONS STATEMENTS

The technical information related to Los Cerros assets contained in this report that relates to Exploration Results (excluding those pertaining to Mineral Resources and Reserves) is based on information compiled by Mr Cesar Garcia, who is a Member of the Australasian Institute of Mining and Metallurgy and who is a Geologist employed by Los Cerros on a full-time basis. Mr Garcia has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration, and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Garcia consents to the inclusion in the release of the matters based on the information he has compiled in the form and context in which it appears.

The information presented here that relates to Mineral Resources of the Dosquebradas Project, Quinchia District, Republic of Colombia is based on and fairly represents information and supporting documentation compiled by Mr. Scott E. Wilson of Resource Development Associates Inc, of Highlands Ranch Colorado, USA. Mr Wilson takes overall responsibility for the Resource Estimate. Mr. Wilson is Member of the American Institute of Professionals Geologists, a "Recognised Professional Organisation" as defined by the Australasian Institute of Mining and Metallurgy (AusIMM). Mr Wilson is not an employee or related party of the Company. Mr. Wilson has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012)'. Mr. Wilson consents to the inclusion in the news release of the information in the form and context in which it appears

The Company is not aware of any new information or data that materially affects the information included in this release.

TABLE 2 - MIRAFLORES PROJECT RESOURCES AND RESERVES

The Miraflores Project Mineral Resource estimate has been estimated by Metal Mining Consultants in accordance with the JORC Code (2012 Edition) and first publicly reported on 14 March 2017. No material changes have occurred after the reporting of these resource estimates since their first reporting.

Miraflores Mineral Resource Estimate, a	as at 14 March 2017 ((100% basis)

(1) All titles an	e part of the A	ndes Gold Project located in Antioquia	Risaralda and Choco

(1) All titles are part of the Andes Gold Project, located in Antioquia, Risaralda and Choco, Departments of Colombia. Pursuant to the Interest Transfer Agreement with Bullet Holding Corporation (Bullet), Andes has a 90% beneficial interest, and Bullet has a 10% interest. All tenements have been crossed checked against the National Mining Authority Registry (ANNA) and reflect the status reported in ANNA. The Colombian Mining Authority's migration to a new tenement management and cadastre system (ANNA) has generated inconsistencies and issues concerning certain mineral tenement boundaries. In addition, there is uncertainty regarding the application and constitutionality of Presidential Decree 1955/19, the purpose of which was to re-instate certain land rights over free land to qualifying informal miners. The issues are not unique to Los Cerros and have the potential to reduce the footprint of a subset of exploration licence applications within the Company's Andes Gold Project. The Company is monitoring the situation and will keep the market informed of developments.

(2) The Titleholders of the tenements are:

- (2.1) Tenements in process of acquisition by Andes Resources EP S.A.S (Andes).
- (2.2) The titleholders of the applications are various companies associated with Bullet and covered under the Interest Transfer Agreement see note (1).
- (2.3) Andes is a subsidiary company of Los Cerros.

(3) Concessions at Exploration Stage have 3 year life extendable for 2 years to a maximum of 11 years.

(4) 10 year life extendable for 10 years and the tenement is in process of transformation to Concession contract.

(5) 5 year life extendable for 5 years and the tenement is in process of transformation to Concession contract.

(6) Applications have neither legal liabilities nor certainty that they will be granted in whole or in part. If the ground was open ground at the time of lodging, a contract for exploration and potential exploitation will be offered to the applicant. Andes has a beneficial interest in the tenement when the application is granted.

Appendix 5B

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Name of entity	
LOS CERROS LTD (ASX: LCL)	

:

ABN	Quarter ended ("current quarter")

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 27 October 2021

Authorised by: The Board

(Name of body or officer authorising release – see note 4)

Notes

- This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- 2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's Corporate Governance Principles and Recommendations, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
